

Applicant name: BCB Environmental Management Limited
Application Reference Number: NY/2009/0176/FUL

I am writing to object to the above application because I am very worried about the impact all these chemicals will have on me and the children in my life. I came to this village from a busy town in Spain, because of its location in the countryside. Now, I am going to be looking at a chimney from my bedroom window and hearing the constant noise of fans and lorries from my bed. It is just unbelievable that this scenario is even possible. I am already feeling depressed about my house and have an uneasy feeling of unrest and I desperately want to move away from here. This is not the reason why I came to this country.

I would also like to point out that I spend an amazing amount of hours as a conservationist. I am a volunteer and am working really hard to help the native wildlife and to encourage the re-population of British native plants that have been brought to the edge of extinction due to the abuse of pesticides and other chemicals. But if there is going to be a chemical blanket falling on these plants and wildlife, I may as well stop my work now. There is just no point.

I am concerned because I don't trust BCB to operate an incinerator safely since they have already shown that they cannot operate safely on a smaller scale without having to be rescued by the local (and other) emergency services. Here I am referring to the incident when fire brigades from three different areas had to deal with a safety issue that BCB couldn't contain.

I'm also concerned because BCB have not told the truth in the past and I don't trust them to tell the truth about the negative impact (of what they are doing) on everyone and on the local environment.
