NY/2009/0176/FUL - 86 Marston Business Park
Applicant name: BCB Environmental Management Limited
Application Reference Number: NY/2009/0176/FUL

Dear Sir/Madam,

I am writing to object to the above application because I believe it will cause harm to the livelihood of businesses in the area and to the quality of life of families living in the area.

.....Many of my customers, suppliers and partners are also in the area. I believe that my business will be negatively impacted by the presence of a hazardous waste plant (as proposed) in the Business Park in Tockwith.

.....In the past few months we have been planning to re-locate to the Tockwith area to make commuting easier and because we have been inspired by the quality of life in the village. If the BCB proposal goes ahead, however, I will find an alternative place to live and will move my business operations away from Tockwith and from North Yorkshire.

.....The BCB operation will have a negative impact on the quality of life in the area due to smells from waste and emissions; the visual impact of having a power station complete with 100ft chimney in a village setting; noises from turbines, normal plant operations, and heavy traffic.

On a separate note, I am also concerned about the environmental, political and commercial impact of siting an Industrial operation in a Business park.I believe that it will encourage businesses to move away from the area and possibly encourage the wrong sort of business into the area.

I am also angry that there has been little or no communication with the people in the area about the deadline for objections. I worry that many residents and businesses in the area may not be given the opportunity to object due to such poor communication.

I strongly urge you will object to the BCB proposal.

Thomas Killeen
